

LIGHT IS NOT
JUST A
FUNCTION,
IT IS EMOTION,
AN INVITATION
TO DREAM.

Hind Rabii creates more than
lighting, she crafts experiences.
Each piece is a dialogue between
material and light, an interplay
of shadow and brilliance. Inspired
by architecture, art, and the
fluidity of nature, her designs
transcend the ordinary to become
objects of contemplation.
With each lamp, a story
is told—one of craftsmanship,
elegance, and emotion. Welcome to
a world where light is poetry.

Where craftsmanship meets light.

Born in 1973, Hind Rabii holds an engineering degree from ISIV - Verviers, Belgium. With this technical expertise and a passion for fashion and architecture, she has been creating contemporary high-end lighting since 1997, blending innovation with tradition.

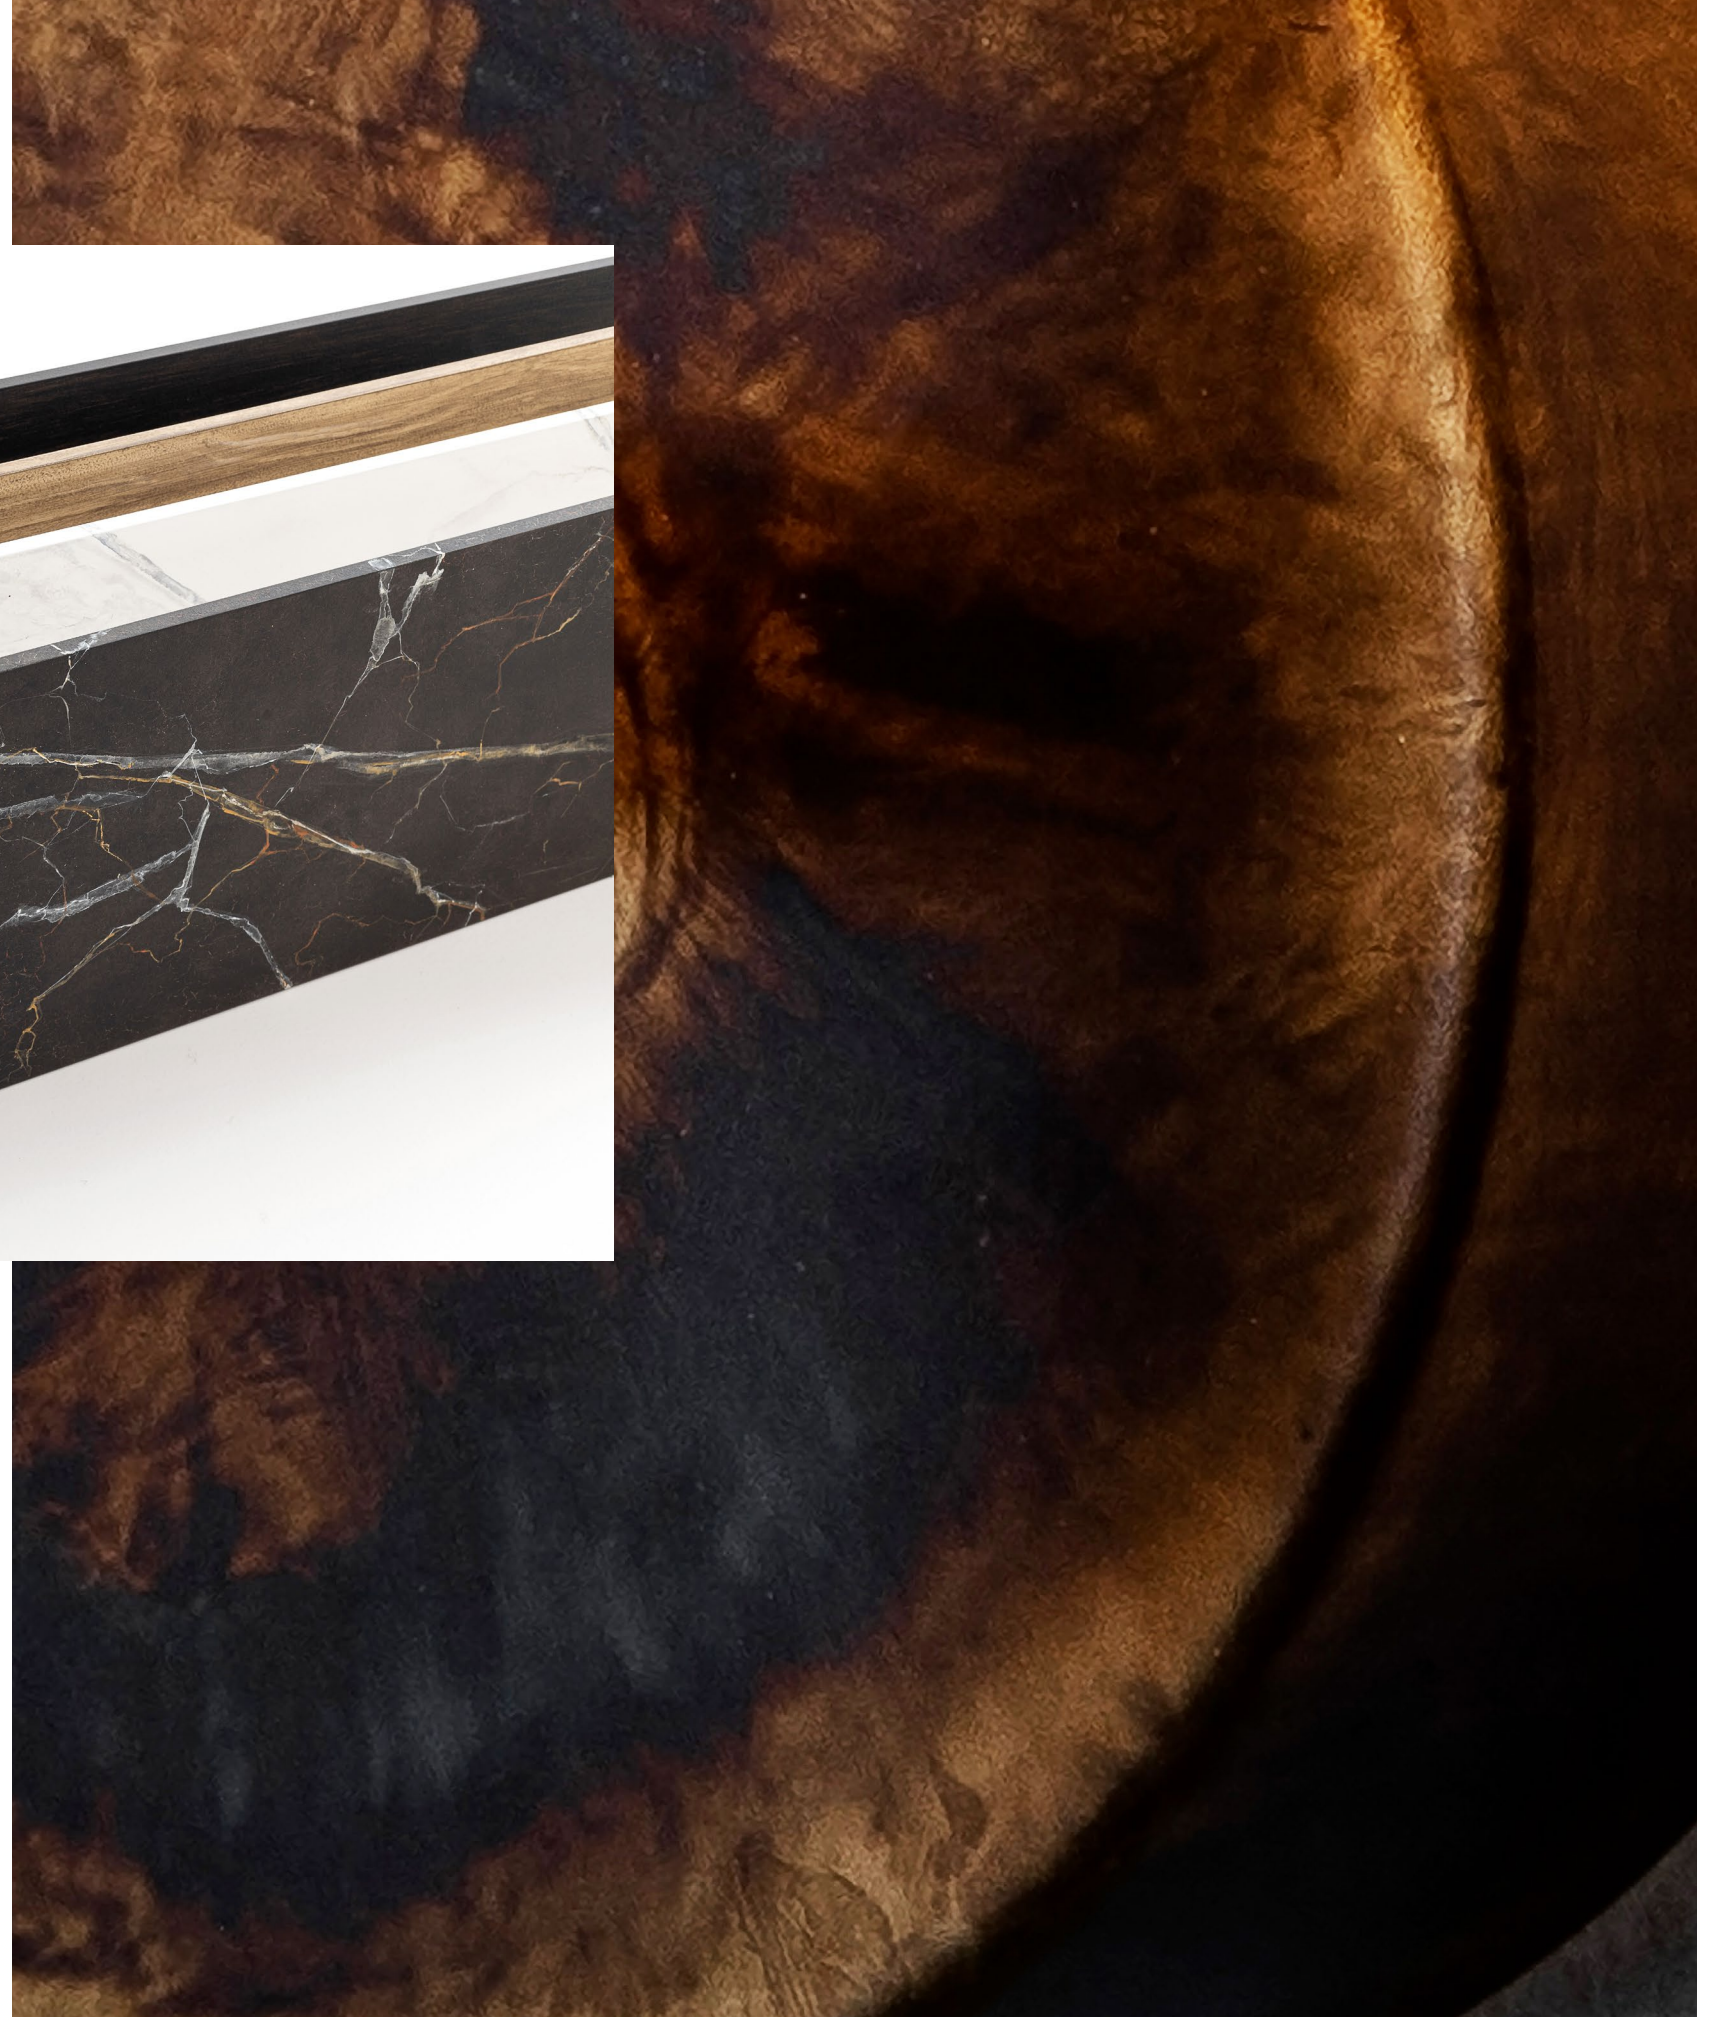

Between heritage and innovation, each piece is a symphony of light, material, and craftsmanship

Light transforms spaces. It defines moods, creates atmospheres, and enhances materials. At Hind Rabi, lighting is not just about function—it is about evocation. Through a careful selection of materials and an impeccable sense of balance, each piece is designed to bring warmth, refinement, and personality to interiors. From delicate glass to raw ceramics, each texture is chosen to play with light, to sculpt it, to give it presence.

At the heart of each Hind Rabii creation lies a devotion to noble materials.

Blown glass that captures the softness of light, ceramic that retains the warmth of the artisan's hands, metal that reflects and structures space—each element is carefully selected and shaped with precision. The result is a balance of contrasts, a refined interplay between lightness and substance, rawness and sophistication.

From Murano glass to Venetian ceramic, each material tells a story, shaped by expert hands, refined by time

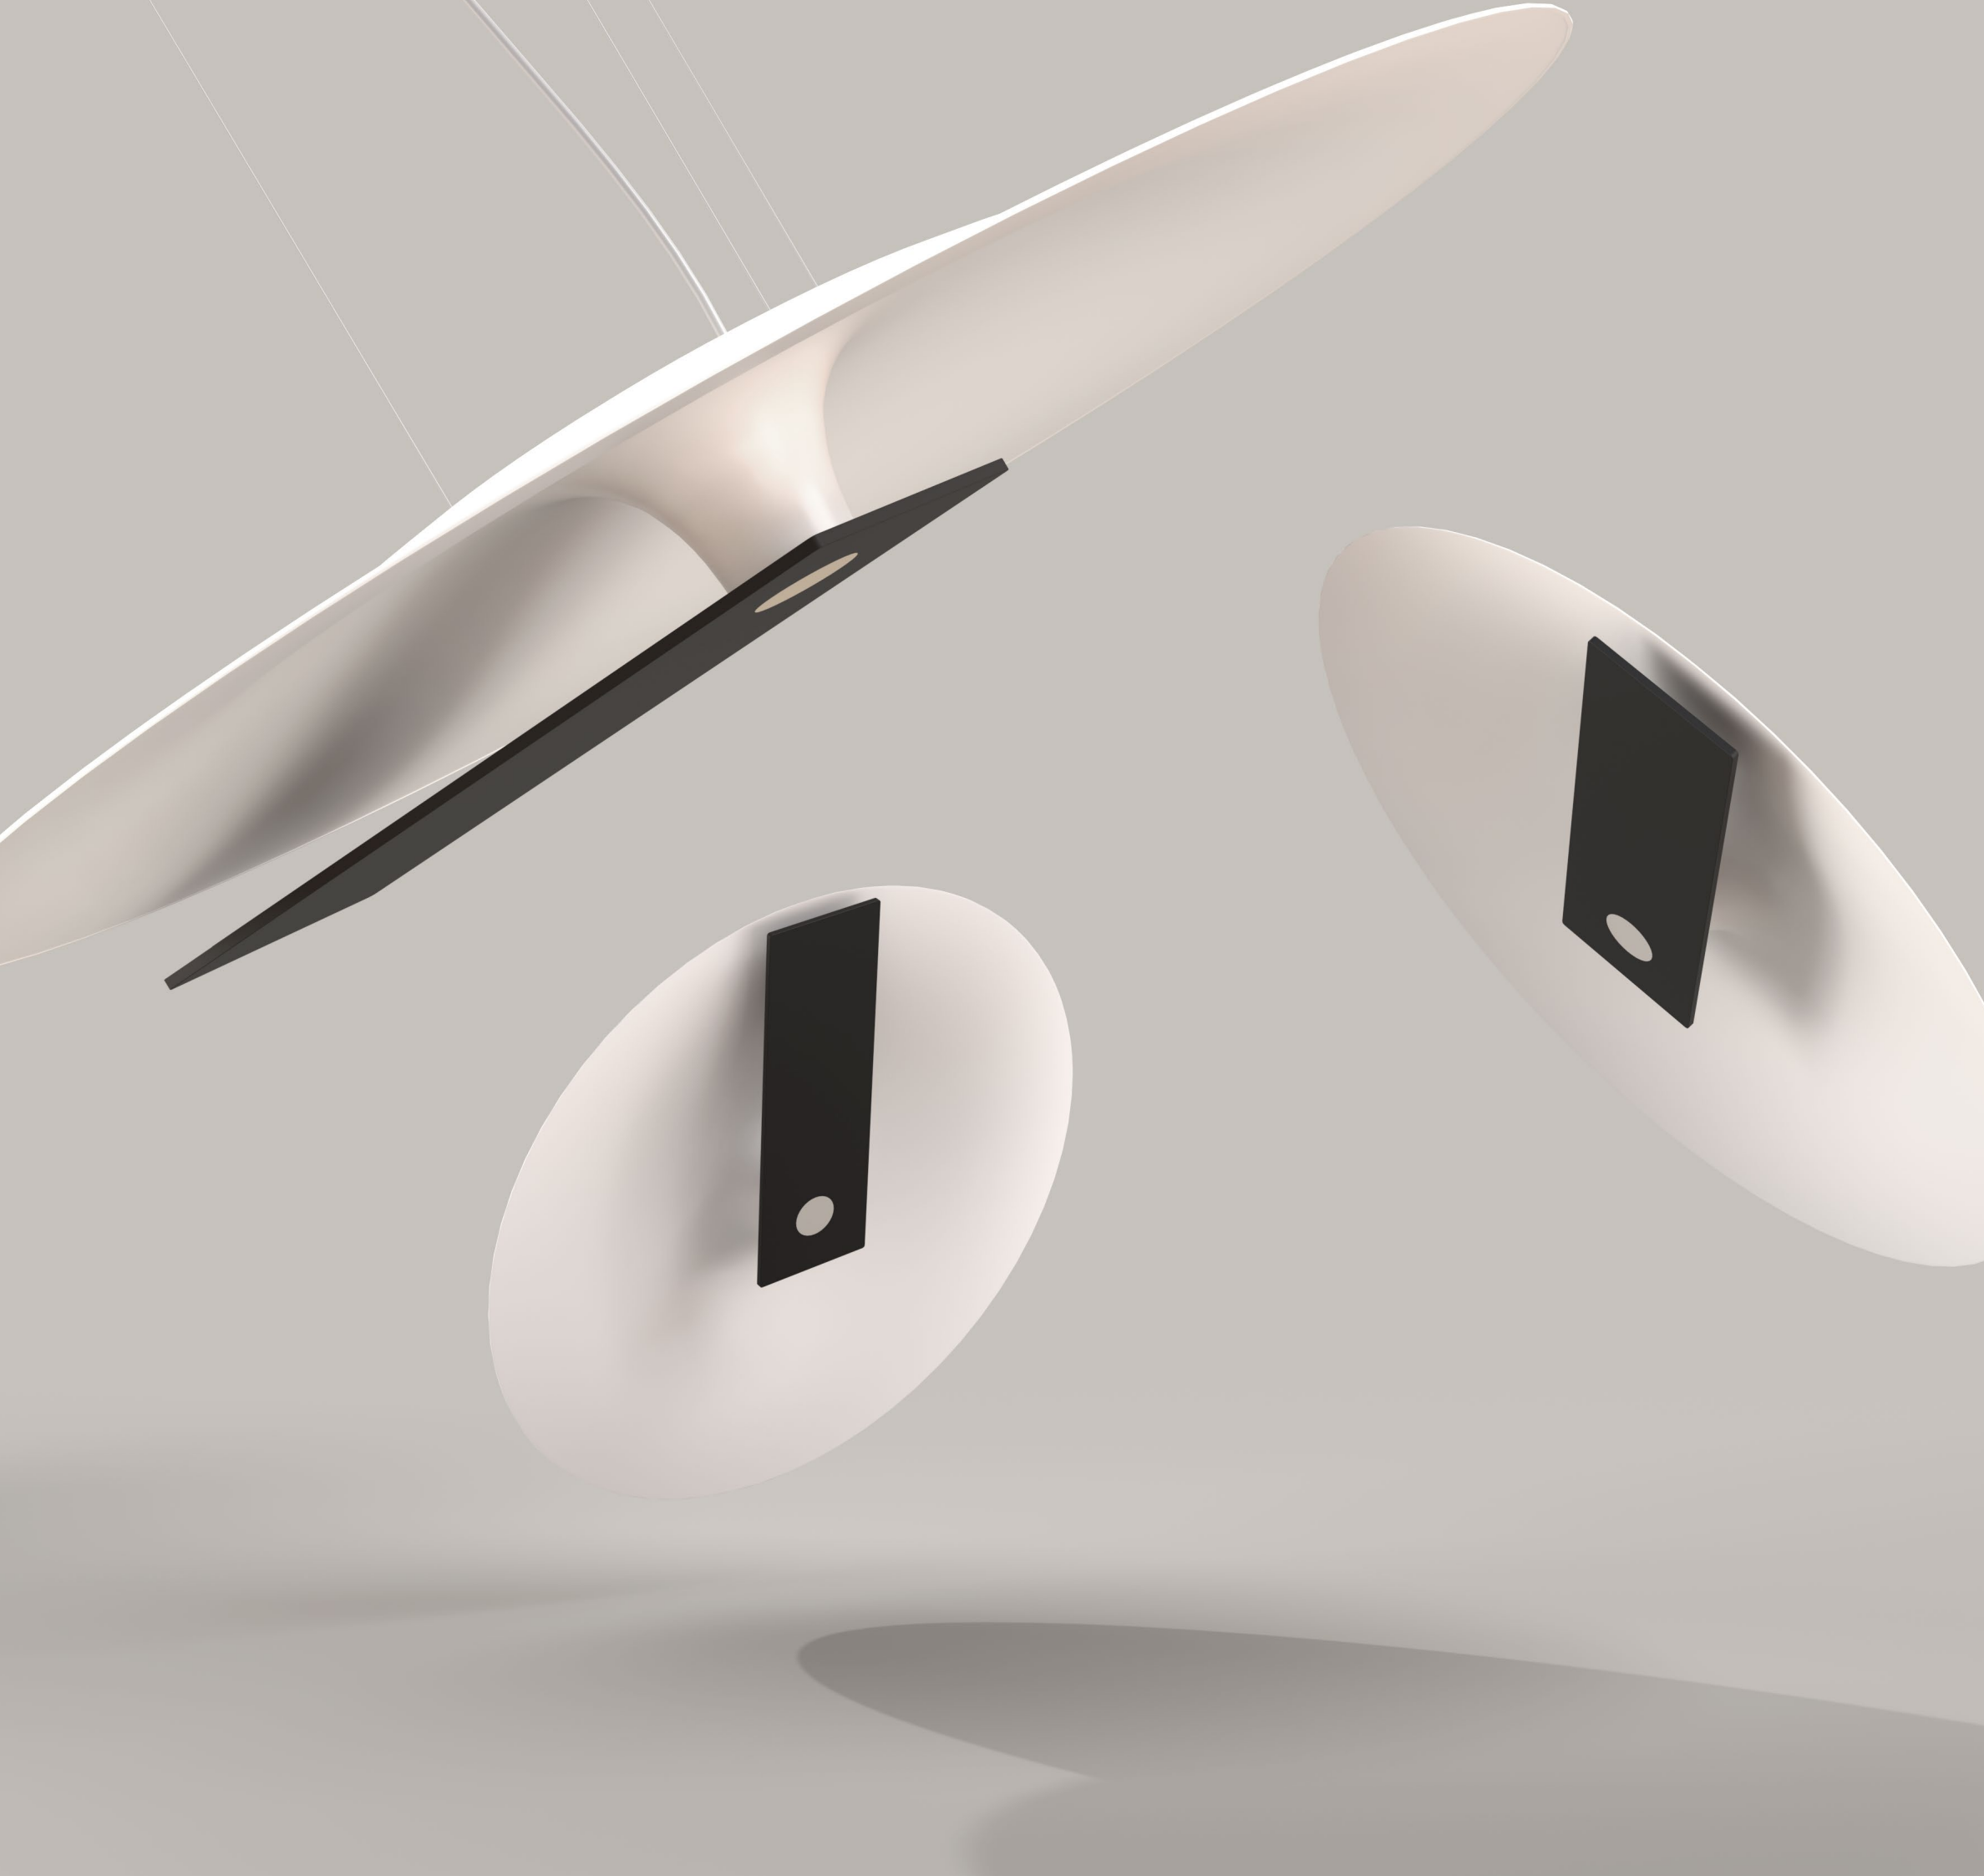

All pieces are crafted in Belgium or in Italy, around the Venetian lagoon – where centuries-old traditions breathe through every gesture. From the delicate art of Murano glass to the precision of Belgian craftsmanship, each creation carries the soul of its birthplace, shaped by the hands of master artisans.
